

The Campus Bulletin

UNIVERSITY OF CALIFORNIA, SAN FRANCISCO NOVEMBER 1970 VOL. 3, NO. 6

Among Bay Area craftsmen displaying and selling their works at UCSF's "December Fair" are (l-r) Beverly Yu, potter; Robert Yelland, weaver; Jill & Steve Jensen, potters; Wendy Kashiwa, textiles; Sandra O'Connor, ceramics; and Peter Ostwald, jeweler. Other handcrafts include leather goods, batik and glass blowing. Proceeds benefit the Educational Opportunity Program (EOP)

DECEMBER FAIR: QUALITY HANDCRAFTS TO BENEFIT EOP FUND

The success of last spring's May Fair encouraged the program committee of the Educational Opportunity Program to present an even bigger and better arts and handcrafts fair for the campus community and the public – DECEMBER FAIR. It will be held in the Millberry Gym on Tuesday and Wednesday, December 1 and 2, from 10:00 a.m. to 6:00 p.m.

The highlight of the Fair is the participation of a dozen hand-picked Bay Area artists and craftsmen whose works have been seen at the Berkeley Art Fair, the Grant Avenue Art Fair, the Rennaissance Pleasure Faire, and in Bay Area galleries. The artists include Peter Ostwald (jewelry), Sandra and Michael O'Connor (pottery and ceramic hangings), Wendy Kashiwa, a UCSF employee (textiles), weaving by Robert and Carole Yelland; potters Steve and Jill Jensen and Beverly Yu; glassblower Don Carlson, Linda Scott (batik dresses), Susan McCollum, (pebble cast candles), and David Bowerstock (leather goods).

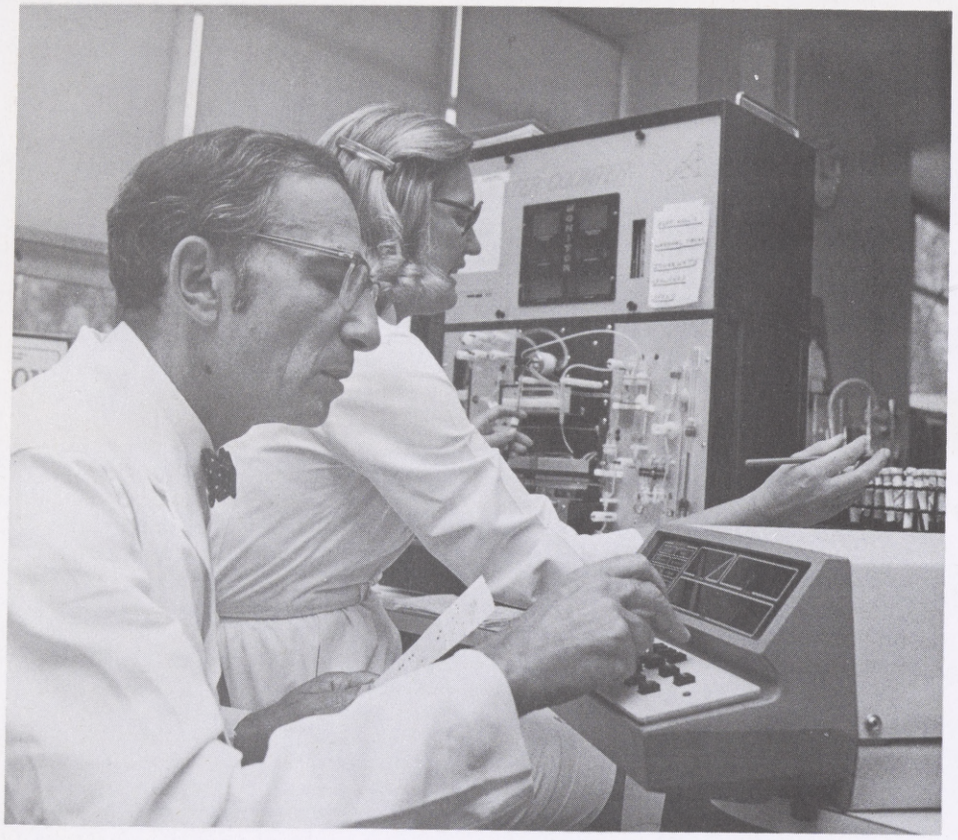

The Program Committee includes Chuck Story, Chairman; Marie Patino, Marsha Nygaard and Judy Cunningham, as well as members of the student-body and faculty. The committee is seeking donations of small art goods and home-made items, as well as home-made breads and pastries. Marsha Nygaard will accept all donated goods from members of the campus community. She asks that food items not be brought until Tuesday morning, Dec. 1, and will be accepted in the Madrone Room by Judy Cunningham.

Volunteers are needed to man the pastry booths and the art-goods booth as well as the cashier's desk. Contact Chuck Story to sign up.

All proceeds are used exclusively for student financial aid.

* * *

COME TO THE DECEMBER FAIR AND HELP EOP!!!

Dr. George Brecher, Acting Chairman of Clinical Pathology and Laboratory Medicine and Director of Clinical Laboratories, University of California, San Francisco and a Laboratory Technician transfer patients' blood test results from a blood-testing machine, directly into the Clinical Laboratories Computer at UCSF.

NEW COMPUTER FOR CLINICAL LABS

A new computerized system to process laboratory diagnostic data on large numbers of hospitalized patients was recently installed at UCSF, and was demonstrated and discussed at a recent news briefing.

The system was developed by Dr. George Brecher, Acting Chairman of Clinical Pathology and Laboratory Medicine, and Director of Clinical Laboratories at UCSF, in collaboration with Berkeley Scientific Laboratories. The National Institute of General Medical Sciences, part of the Department of Health, Education and Welfare's NIH, provided grant support totaling $500,000 for the new system.

Operating units have been in use in 12 U.S. hospitals for the past year, and another 12 are scheduled for delivery during the next few months. The system improves patient care by making available to the physician cumulative daily summaries of all laboratory work done on each of his patients. It allows the physician to survey all of the patient's lab tests at a glance and to follow the patient's progress as reflected by this data. Over 300 tests are now used here to aid in medical diagnosis.

In addition, test data is instantly available from the computer which stores all requests made during the day together with results or a notation that tests are still in progress. Frequent ward reports place clinical laboratory results at the fingertips of attending physicians at a time when they actually examine their patients.

The system is built around a small computer with a specially modified disc device that enlarges and speeds data storage beyond the core capacity of the computer. At numerous entry points, the system reads instruments automatically, and at others the interface is through specially designed laboratory data consoles which are built to fit the convenience of technologists and which instantaneously indicate acceptance of data by the computer. Data is rejected if erroneous identification of specimens or tests occurs. The computer can be programmed to reject results that are so unusual that they should be rechecked before reporting them to the physician.

The system is adaptable to small, medium-sized and large hospitals.

DR. AIRD RECEIVES 1970 DR. J. ELLIOT ROYER AWARD

The Dr. J. Elliot Royer Award is given this year to **Robert B. Aird, M.D.,** Professor of Neurology at the University of California, San Francisco, Presentation of the certificate of award and a check in the amount of $15,000 was made by Dr. Charles Carman on behalf of the Regents of the University of California on October 27th at the meeting of the San Francisco Medical Society.

Established under the terms of the will of the late Dr. Royer, this annual honor is given to a San Francisco Bay Area medical person in recognition of significant contributions to the advancement of psychiatry and neurology.

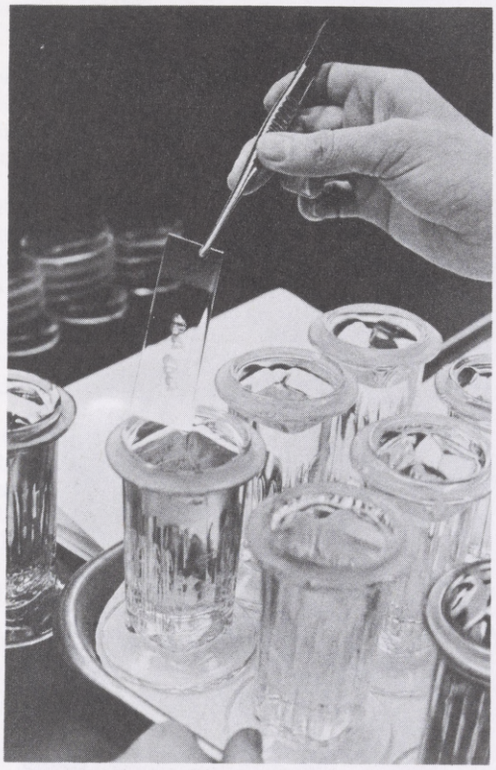

Dr. Aird, who is also Director of the Electroencephalographic Laboratory and of the Electromyographic Laboratory at UCSF, pioneered in developing teaching and research programs, as well as diagnostic and therapeutic programs, in neurology. His bibliography of 228 papers reflects the progress of his research over a period of forty years; complimenting his scientific work is a lengthy list of service committees and organizations through which his influence on clinical medicine has been made evident. Included among the committees on which he has served are: Research Fellowships in Neurology, National Foundation for Infantile Paralysis, Inc.; Joint Committee on EEG Certification (American EEG Society), American Neurological Association, and American Academy of Neurology; Committee on Status, Recruitment, and Training of Students in Electroencephalography and Clinical Neurophysiology; Advisory Committee on Evaluation of Clinical Therapy, USPHS. He is also Trustee of the Deep Springs College, and a member and Trustee of the William G. Lennox Fund. He is also a member of the National Medical Advisory Board of the Epilepsy Foundation of America.

A native of Provo, Utah, Dr. Aird is a graduate of Cornell University and the Harvard Medical School. He and his wife, the former Ellinor H. Collins, live in Mill Valley, Marin County, California.

CALIFORNIA RMP NEW LOCATION

California Area I Regional Medical Programs' office has moved to 745 Parnassus Avenue. The new telephone is 666-4221. Some staff remain at other locations, but all can be reached through the above office.

SCHOLARSHIP GRANT TO UCSF COED

A $2,400 scholarship grant has been awarded to Miss Judy Ann Thomas of the University of California at San Francisco by the California Division of the American Cancer Society.

The grant, according to the announcement made by the California Division in San Francisco, is for the study of cells, specifically Papanicolaou Cytology.

Miss Thomas, a junior student, is a biology major doing research work in abnormal cells, staining and collateral materials as part of her cancer study.

Secretions collected by the physician are "fixed" on glass slides and sent to the laboratory where they are screened under the microscope. Cytology...the study of cells...offers fine career opportunities for women, and the demand for qualified people continues.

PHARMACY SCHOOL LOAN FUND A GIFT OF LATE ALICE RIDDLE

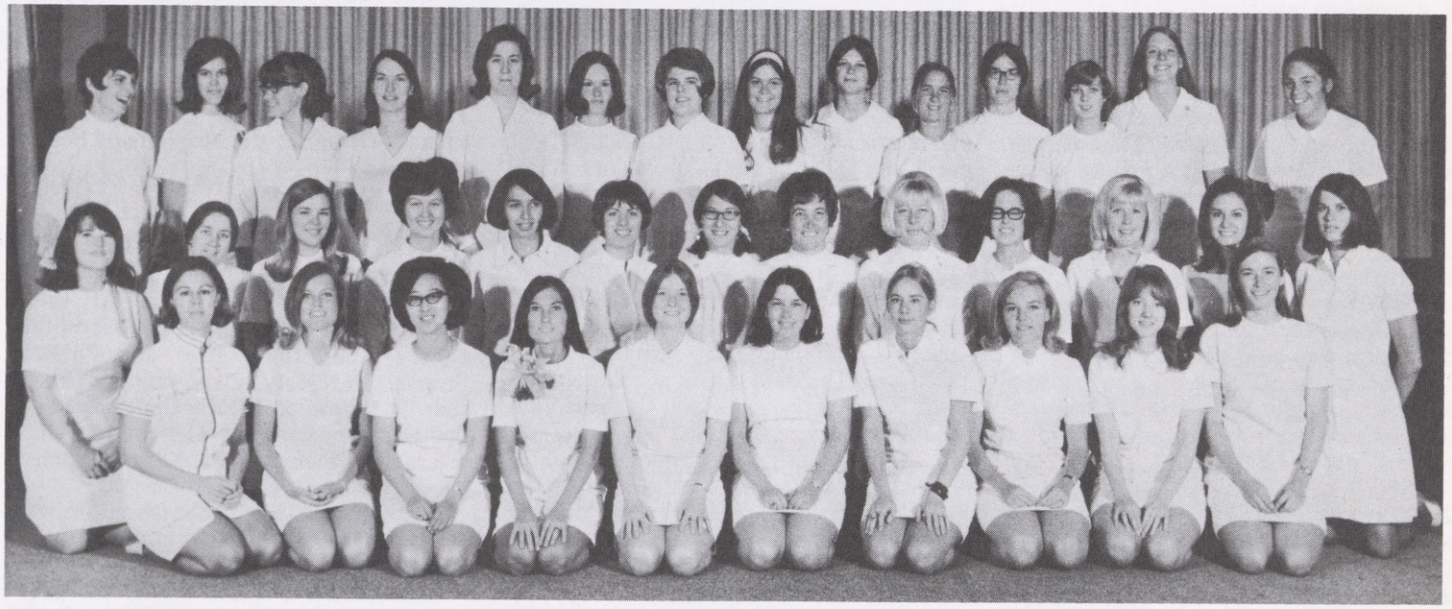

Alice Riddle, who worked for many years in the Chancellor's office passed away in the summer of 1969 after a brief illness. This month it was learned that in Miss Riddle's Will, the School of Pharmacy, University of California, San Francisco, was named as one of its beneficiaries.

According to Jere Goyan, Dean of the School, one half of Miss Riddle's estate will be given for aid to students, to be known as The Mary H. Riddle Student Loan Fund.

Alice Riddle came to the UCSF campus about 15 years ago, and with Naomi McHugh opened the Provost's office; she was one of the first employees of what is now the Chancellor's office. Alice is remembered by Harriet Burroughs as a friend to everyone on campus, always having time to help or listen, and even to loan lunch money in emergencies. "She remembered everything—every minute detail, including when to water the plants. She is very much missed."

No one really knew how long Alice had been ill; if anything was wrong she concealed it with a smile and a cheerful personality.

"We are proud and pleased to accept this generous gift. The loan fund will be used in fond memory of a wonderful lady," said Dean Goyan.

News from SFGH

A LOOK AT SF GENERAL AND ITS FUNCTIONS

. . . The major role of SFGH is to provide the City and County, as a whole, with services that can best be provided by a single facility serving all of the people. In this capacity, it serves all citizens regardless of place of residence, income, educational level, race, religion or ethnic background.

. . . Thus, SFGH functions as the major Trauma and Emergency Treatment Center for all of the City. It's the only facility treating trauma and emergencies 24 hours a day, 7 days a week, 365 days a year. The Major Trauma and Emergency Center consists of much more than just the Emergency Room and the surgical service. It consists of all the supportive Intensive Care Units in the Hospital (General ICU next to Surgery, Pulmonary ICU for severe chest injuries or emergencies, Cardiac ICU, The Renal Dialysis Unit for kidney failure or rapid drug detoxification), and the Laboratory, Blood Bank and Radiology facilities.

. . . SFGH serves the entire city as the Center for Treatment of Communicable Diseases, tuberculosis, skid row alcoholics and violent alcoholics who are not wanted by private hospitals, prisoners, wards of the court, psychiatric patients, and indigents. These city-wide services generate approximately two-thirds of the total work load.

. . . Another role of SFGH is to serve as a district or neighborhood hospital for the areas closer to it; mainly the Hunters Point-Bayview, and Mission areas, but also the Chinatown and Central Cities areas because it is the closest major facility available to them. SFGH not only provides the above-mentioned services to those areas, but also provides more typical surgical, medical, obstetrical and pediatric services. These services generate about one-third of the total workload.

. . . SFGH is accredited as a teaching hospital. A contract between the University of California School of Medicine and the City & County of San Francisco provides for the University to operate a post-graduate educational program and to furnish professional medical services.

. . . SFGH has 822 beds, a work force of 2,400 employees and a current operating budget of approximately $23,600,000.

. . . All members of the staff, both active and attending, have clinical or full time faculty appointments to the University and are appointed by the Director of Public Health upon nomination by the appropriate department and by the Dean of the School of Medicine.

. . . The faculty is responsible for supervising the care of all patients admitted to the hospital or seen in outpatient clinics. Second, third and fourth year students from the School of Medicine receive their training at this Hospital. The entire resident staff is taught by the University and paid by the City. Interns there are paid by the City and are registered as post-doctoral students.

. . . Present projects include staffing the Emergency Room with Triage Officers, to move admitting functions away from E. R., and to have immediately available social workers and X-ray personnel in the E.R. area. The wards are now being staffed with Ward Clerks and Blood Drawers from the laboratory.

. . . At present, the night clinics in the Outpatient Department include Pediatrics, which is open 15 hours a day Monday through Friday, and 8 hours a day on weekends; Surgery, open from 6:00 to 10:00 p.m. on Monday, Tuesday and Thursdays; and Medical, 6:00 to 10:00 p.m. five nights per week. Clerical, Medical Records, Pharmacy, Social Service and Nursing staff as well as physicians will staff night clinics.

. . . Programs being carried on outside SFGH include a Volunteer Interpreter program, Neighborhood Health Centers, Satellite Clinics, Night Clinics, Community Education Programs (in Health), and Training Programs (for community personnel to work in the hospital and health centers.)

SFGH PARTY NOTE *(Photo)*

On Tuesday, December 22 from 10 to 11:30 a.m., The Annual SFGH Children's Christmas Party will be held in the Nurses Auditorium, 23rd and Potrero Streets. The party, a six year old tradition, is sponsored by the Department of Pediatrics and its staff. The children who are invited include patients of specialty clinics, pediatrics clinics and wards.

A community-oriented celebration, over 500 children and their parents are expected to attend.

Refreshments, Santa Claus, the gifts and entertainment are donated by individuals and community organizations and shops.

The program is generally monitored by the "Foster Grandparents", who help wrap gifts, serve food and keep the children together. For further information, contact Miss Tischopp at SFGH, Department of Pediatrics, 648-8200, ext. 519.

BULLETIN BRIEFS

Alexander R. Margulis, M.D., received an honorary fellowship of the Faculty of Radiologists of Great Britain. This citation was received at the Royal College of Surgeons in London. Twenty people throughout the world have received this citation, including two Americans: Dr. Margulis and Professor Leo G. Rigler of UCLA.

* * *

Theodore Phillips, M.D., has been appointed Professor and Director of Radiotherapy. He succeeds Dr. Franz Buschke who retired.

* * *

Glenn Sheline, M.D., Professor and Vice Chairman of Radiology was recently elected First Vice President of the American Roentgen Ray Society.

* * *

Richard Greenspan, M.D., was appointed Director for the Experimental Diagnostic Radiology Laboratory here.

* * *

Carl Olaf Ogenfors, M.D., is the new Director of Radiology at Fort Miley VA Hospital. Dr. Ogenfors was formerly head of the Thorax Clinic of Radiology, Karolinska Institute, Stockholm.

* * *

Julius H. Comroe, Jr., M.D., Director of the Cardiovascular Research Institute, was College Medalist Lecturer at the 2nd Fall Scientific Assembly (36th Annual Meeting) of the American College of Chest Physicians, October 28 in Chicago. Dr. Comroe spoke on "Contributions of Basic Research to the Clinical Practice of Chest Disease."

* * *

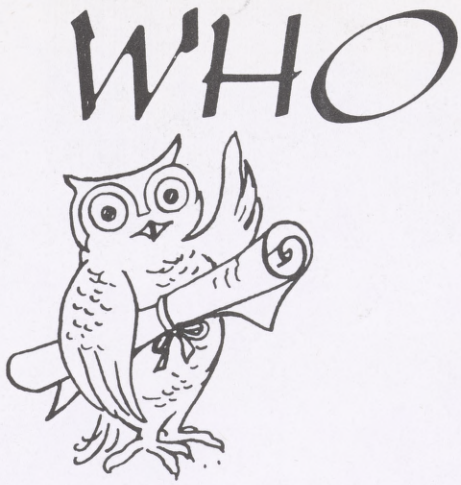

Albert Behnke, M.D., Professor of Clinical Medicine, and an expert in the diving medicine field, was honored recently at a 2-day symposium entitled "Man/Sea 70".

PHARMACIST MAYER TURNS OVER $1,000 AWARD TO PHARMACY SCHOOL FOR MINORITY RECRUITMENT

Pharmacist Frederick S. Mayer (UC'54) of the Sausalito Pharmacy, has been named winner of the fourth annual National Pharmacy Scholarship Award co-sponsored by the National Association of Retail Druggists; a six man judging panel announced their decision last month at the 72nd annual meeting of the N.A.R.D. in Atlantic City, N.J.

The award, a scholarship grant of $1,000, will be presented to the School of Pharmacy, UCSF, at Mr. Mayer's request, for minority recruitment programs.

Mr. Mayer was selected as this year's winner on the basis of his involvement and participation in California's statewide venereal disease education and awareness programs, two of which have been held at UCSF in conjunction with the Board of Education and other agencies.

DR. RAPAPORT APPOINTED ASSOCIATE DEAN, REGIONAL MEDICAL PROGRAMS

Charles T. Carman, M.D., Acting Dean of the School of Medicine, has announced the appointment of Elliot Rapaport, M.D., as Associate Dean for Regional Medical Programs. Dr. Rapaport, Professor of Medicine at the School, has been Acting Coordinator of the University-based Area I Regional Medical Program since 1966.

According to Dr. Carman, "The Associate Deanship is a formal recognition of RMP's significant outreach role and its importance in the overall program of the School of Medicine. This is the first time the University has been able to go to the community and say, 'What are your resources? What are your needs? How can we help you?' "

The Regional Medical Program for Area I now has eight federally-funded operational grants, totaling more than $2 million a year. These programs are developed with and for communities throughout northwestern California. They include activities in cancer, cardiopulmonary resuscitation, continuity of care, coronary care, family practice, hypertension, intensive care, and stroke.

"The nature and scope of the program reflect a recognition on the part of both the University and the community that there is much to be gained by combining our resources to improve health care," according to Dr. Carman. "The exceptional success of RMP in this area is largely due to Dr. Rapaport's efforts in organizing it and getting it underway."

DR. HERBERT VANDERVOORT DELIVERS THE 1970 JAKE GIMBEL SEX PSYCHOLOGY LECTURES

The 1970 Jake Gimbel Sex Psychology Lectures, which began on November 12 for five weeks, are being delivered by Herbert Vandervoort, M.D., Associate Clinical Professor in Psychiatry. The series topic is *"Whatever Happened To . . .?"* Lecture topics are ". . . Sex Education," ". . . Old Fashioned Sex," ". . . Just Plain Topless," "...Those Kids," and ". . .Those Adults."

Dr. Vandervoort will present the lectures as follows:

Thursday, November 12 – "Sex Education" – the history of sex education, present attitudes pro and con, what questions are foremost in children's minds at different ages; and will include sections of films from the insipid to the controversial to an avant-garde film, presently being developed.

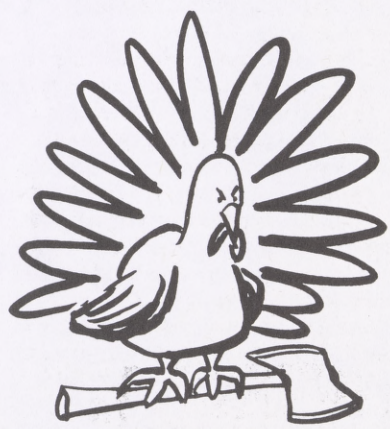

Tuesday, November 17 – "Old Fashioned Sex" – the so-called "sexual revolution" in perspective, and some of the newer studies on sex and social class.

Tuesday, November 24 – "Just Plain Topless" – essentially the San Francisco scene as it has developed from the tease to the bludgeon and from the humorous to the blatant.

Tuesday, December 1 – "Those Kids" – a review of childhood sexuality and an examination of whether sexual behavior has changed that much; the present questions and ethical values children are developing.

Monday, December 7 – "Those Adults" – a review of Masters and Johnson's sex approach, the implication of female demands for sexual gratification, changing views of female sexuality, and what will happen when men are knocked off the sexual supremacy perch.

The lectures are open to all campus personnel and students, will be held in the Medical Sciences Auditorium from 12 to 1 p.m., and are presented through the Committee on Arts and Lectures.

The Campus Bulletin is published by the Office of Public Information, University of California, San Francisco. Send news information for publication to Donna Patrick, 509 University Hospital. Copy deadline is one month before publication date.

The CAMPUS BULLETIN is published eight months per year. In October, November, February, March and May, the Campus Bulletin will be available in newsstands at ten central locations on campus. In September, December and June, the CB also will be mailed to the homes of all students, faculty, housestaff and employees.

CHILDBIRTH FILM IS WINNER OF OHIO FILM FESTIVAL AWARD

"BIRTHDAY–Through The Eyes of the Mother", a unique film on childbirth, has won the "Chris" statuette–the highest award of the Columbus (Ohio) Film Council in the Health, Medicine & Safety category–during their 1970 Film Festival in October.

Filmed through the Communications Office for Research and Training (C.O.R.T.) here, the film was produced by Lawren Productions, Inc., Burlingame, directed and edited by Lawrence A. Williams and Thomas Gregory.

Consultants included Alan Margolis, M.D., Associate Professor and Vice Chairman of Obstetrics & Gynecology; Karl H. Hanson, M.D., Associate Clinical Professor of Psychiatry; Cy Francis, M.D.; Barbara J. Brugge, R.N., Nursing Supervisor; James W. Crawford, Public Information Officer, UCSF; and Jean Bolton May, Executive Director of the Florence Crittenton Home, co-producer of the film. Mrs. May's consultants were Pat Murphy, R.N. and Helen Thompson, R.N.

Special thanks in the award went to the young mother and her baby boy–the unnamed stars of the production; and to the UCSF obstetrics staff members, "who, when the moment finally came, rose to the occasion, giving a beautiful, professional performance." They were Kenneth W. Shunk, M.D., Tom Joas, M.D., Jeanne Happ, R.N., Kathy Powers, R.N., and Robert S. Rhodes (soon-to-be M.D.).

Cinematography was by Richard Beindorf, C.O.R.T. and sound by David Strauss, C.O.R.T.

Others who worked on the film were Don Palmer (sound mix and conformation of original film); W. A. Palmer Films, Inc. (processing, work print, titles); and Consolidated Film Industries (optical track, release prints).

CARDIOTHORACIC SURGERY TRAINING GRANT

The U.S. Public Health Service has awarded the University of California, San Francisco, a $210,000 grant for the first three years of an advanced training program in Cardiothoracic Surgery. The grant will support four trainees, each of whom will spend two years in a carefully planned program to equip them for an academic career covering all aspects of surgery for the heart and lungs.

The grant and the training program are under the direction of Benson B. Roe, M.D., Professor of Surgery. Four other members of the surgical faculty will be active participants; they are L. Henry Edmunds, Jr., M.D., Associate Professor of Surgery; Orville F. Grimes, M.D., Associate Professor and Vice-chairman, Department of Surgery; Noel H. Fishman, M.D., Assistant Professor of Surgery; and Richard G. Sanderson, M.D., Assistant Professor of Surgery In-residence.

Other members of the faculty in Cardiology, Radiology, Medicine, Anesthesia and Pediatrics will actively contribute to the teaching.

A REQUEST TO THE CAMPUS COMMUNITY TO OBSERVE SMOKING REGULATIONS

For the comfort and safety of patients, their families and visitors, Hospital Administration has asked that students, physicians and employees observe the smoking regulations for UCSF Hospitals and Clinics.

Campus personnel are asked to refrain from smoking in areas where there is direct contact with patients, such as X-ray, radiology, examination, treatment and patient rooms, and in conference rooms when a patient is being presented.

Visitors are also requested to observe no smoking rules in patients' rooms and in areas where there would be hazard or discomfort to a patient.

Smoking is prohibited in rooms where Oxygen is being stored or administered.

Areas where smoking is permitted include, of course, the cafeterias, waiting areas, lounges, restrooms and locker areas; enclosed charting rooms on nursing units; non-patient office areas; and non-patient care departmental space approved by the department head or supervisor.
